1. Introduction

1.1. About SLTDS

Digital Services – Sri Lanka Telecom (Services) Limited (SLTDS) is a wholly owned subsidiary of Sri Lanka Telecom PLC (SLT), a telecommunications service provider of Sri Lanka. SLTDS specializes in delivering comprehensive digital solutions, including web development and maintenance services, digital marketing services and business directory information dissemination through SLT Rainbow Pages.

Leveraging the technological expertise, infrastructure strength, and industry credibility of the SLT Group, SLTDS plays a key role in supporting businesses and public sector organizations in digital transformation journeys. The company focuses on developing scalable, secure, and user-centric digital platforms that enhance online visibility, operational efficiency, and user engagement. With a strong emphasis on quality, compliance, and service excellence, SLTDS ensures that all digital solutions adhere to industry best practices and regulatory requirements.

Through continuous innovation, customer-centric service delivery, and strategic alignment with national digital initiatives, Digital Services – Sri Lanka Telecom (Services) Limited contributes to strengthening Sri Lanka’s digital ecosystem while enabling organizations to achieve sustainable growth through effective digital presence and technology-driven solutions.

1.2. Project Description

Digital Services - Sri Lanka Telecom (Services) Limited is pleased to submit this proposal for the development of a comprehensive website for the Department of Christian Religious Affairs . Digital Services – Sri Lanka Telecom (Services) Limited possesses the strategic capability, creative expertise, and technological resources required to address the unique website requirements of the Department of Christian Religious Affairs . The websites developed aim to support organizational objectives by presenting the brand in a clear, professional, and accessible manner to the target audience. Leveraging the expertise of web designers and graphic designers, the websites are designed to enhance user engagement, improve understanding of organizational offerings, and contribute to increased visibility.

Department of Christian Religious Affairs requires a full website build to support digital growth strategy. This proposed website will allow Department of Christian Religious Affairs to expose brand to organic audiences via search engines, leverage digital advertising to boost lead generation, and deploy content marketing to build brand awareness and authority.

This proposal consists of information with regards to team capabilities, the solution that propose for Department of Christian Religious Affairs as well as why Digital Services - Sri Lanka Telecom (Services) Limited would be the best partner for Department of Christian Religious Affairs website development project.

1.3. Proposed Solution Overview

The users can access the site using various gadgets, including workstations, smartphones, and tablets. All the devices are connected to the internet, and this is the medium of communication between the user and the server. All this information is sent by all these devices via the internet to the server, after which the backend of the site handles the requests and sends the corresponding responses accordingly. This architecture provides the benefit of making the site accessible on various platforms, performing with uniform access, and offering a smooth user experience despite the platform.

Figure 1.1: Proposed Solution Overview

2. Project Objectives

2.1. Main Objective

The primary objective of this project is to design, develop, and deploy a secure, scalable, and user-centric website that effectively represents the Client's digital presence while supporting business objectives through improved accessibility, usability, and operational efficiency.

2.2. Sub Objective

- To enhance the Department of Christian Religious Affairs's online visibility and strengthen brand credibility by providing a modern, visually appealing, and fully responsive web interface that effectively represents the Department of Christian Religious Affairs identity.
- To deliver a seamless and intuitive user experience across all devices and web browsers, ensuring that visitors can access information and navigate the website efficiently and effortlessly.
- To enable efficient and streamlined content management through a centralized, user-friendly administrative interface that allows authorized personnel to update and maintain website content without technical assistance.
- To ensure the secure handling of sensitive data while maintaining compliance with applicable regulatory requirements and industry-standard best practices for information security.
- To improve the dissemination of information, encourage higher user engagement, and enhance service accessibility for a diverse range of audiences and stakeholders.
- To establish a scalable and flexible platform capable of accommodating future upgrades, enhancements, and integrations, ensuring long-term adaptability to evolving needs and technological advancements.

3. Project Approach and Implementation Methodology

This project involves the design, development, and deployment of a fully customized website tailored to the Department of Christian Religious Affairs requirements. To start, team will have a comprehensive requirement-gathering and discovery stage where team will collaborate with the Department of Christian Religious Affairs to learn the brand identity, aims, audience profile, and design preferences of the Department of Christian Religious Affairs. Through close collaboration, the website's layout and content presentation will be designed to reflect the client's values and consistently communicate their message across all pages.

Based on the principles of modern UI/UX design and industry-based development frameworks, team will develop a visually appealing, intuitive, and user-friendly digital interface. The site will be designed in a very responsive manner, which would offer the optimum functionality and accessibility to a broader number of devices, including desktops, tablets, and smartphones. This will include optimization methods of performance like efficient loading, simplified navigation, and clean code structure that will enhance smooth flow and a constant user experience.

After the development process, team will be involved in the entire deployment and hosting infrastructure process so that the website is deployed successfully, configured appropriately, and the integration of all the necessary services. Team will conduct extensive testing, in terms of functional testing, performance testing, compatibility testing, and security testing, so as to ascertain that the platform performs under real-world scenarios.

The entire goal of the given project is to provide a high-quality, modern, and reliable website that is not only in line with the needs of Department of Christian Religious Affairs but also an addition to Department of Christian Religious Affairs long-term digital strategy. The last site will become the professional representation of the brand of the Department of Christian Religious Affairs and will offer a strong basis for improved user involvement, customer confidence, and development of organization.

4. Functional Requirements

The proposed website will provide the following functional capabilities to support effective content delivery, administration, and user engagement:

- Display of structured, accurate, and updated organizational information.
- User-friendly navigation with clearly defined menus and page hierarchy.
- Content Management System (CMS) functionality to enable authorized users to create, update, and manage website content.
- Role-based administrative access to ensure controlled content and system management.
- Secure contact, inquiry, and feedback forms.
- Integration capability with third-party systems, tools, or external services where required.
- Support for multimedia content, including images, documents, and videos
- Generation of essential analytical and operational reports, including:
 - Monthly visitor traffic reports
 - Goal completion reports
 - Visitor trend analysis
 - Browser usage statistics

5. Non - Functional Requirements

The non-functional requirements shall be fully implemented and supported throughout the website development lifecycle. These requirements will be thoroughly tested and quality assured during the QA planning and implementation stages to ensure optimal performance, reliability, scalability, and security.

- **Responsive Design** - The website shall feature a fully responsive design, ensuring seamless viewing and interaction across desktops, tablets, and mobile devices.
- **User Interface Quality and User Experience** - The system shall provide a modern, intuitive, and user-friendly interface designed in accordance with contemporary UI/UX principles to enhance usability and user engagement.
- **Availability and Support** - The website shall operate on a 24x7x365 basis, ensuring continuous availability. Continuous technical support shall be provided to address incidents, maintenance requirements, and operational issues.
- **Security Compliance** - The solution shall comply with industry-standard security practices, including but not limited to:
 - Secure encrypted communication using SSL/TLS protocols
 - Protection against common web vulnerabilities such as Cross-Site Scripting (XSS), Cross Site Request Forgery (XSRF), SQL Injection, and Denial-of-Service (DoS) attacks.
 - Enforcement of strong password policies to ensure user account security
 - Deployment of a robust firewall to safeguard server and application infrastructure.
- **Performance Requirements** - Visitor-facing operations shall perform within acceptable response time limits:
 - Static content (without images) shall load within 3 seconds
 - Pages with a single database connection shall load within 6 seconds
 - Pages containing external system integrations shall load within 12 seconds, even during peak usage

- **Search Engine Optimization (SEO)** - The website shall incorporate on-page SEO best practices to improve search engine visibility and ranking.
- **Scalability** - The platform shall be scalable to accommodate future growth in user traffic through the addition of server resources or hardware nodes as required.
- **Logging and Monitoring** - The system shall maintain detailed server logs and user activity logs to support auditing, monitoring, and troubleshooting.
- **Backup and Disaster Recovery** - Automated daily backups shall be performed and securely transferred to the Disaster Recovery (DR) site provided by Digital Services – Sri Lanka Telecom (Services) Limited.
- **Standards Compliance** - All web pages shall comply with standard HTML coding practices to ensure consistency, accessibility, and cross-browser compatibility.

5.1. Security Testing Approach

The Security Testing Approach, which is a continuous cycle that involves Analysis, Design, Development, Testing, and Maintenance. During the Analysis phase, threat modeling and architectural reviews are performed to detect potential risks at an early stage. The design phase is aimed at the review of the structure of the application so that security is incorporated into the system. In Development, the source code is subjected to reviews in an attempt to identify vulnerabilities in the source code base. The testing phase involves penetration testing and vulnerability testing to test the security strength of the application. Lastly, the Maintenance stage is a continuous support and guidance to overcome other emerging threats and make the system secure in the long run. This cyclic nature of the process guarantees the penetration of security across the entire application lifecycle.

Figure 5.1: Security Testing Approach

6. Application Technology

This section details the technologies that will be utilized in the development of the website to ensure a modern, responsive, and cross-platform compatible user experience.

Frontend Technologies:

1. Bootstrap 5: Front-end framework that enables developers to create responsive, mobile-friendly websites
2. HTML5: The latest version of Hypertext Markup Language, ensuring structured and semantic content.
3. CSS3: The latest styling language for web pages, providing enhanced design capabilities.
4. Tailwind CSS: A utility-first CSS framework that allows for rapid, customizable design using pre-defined classes directly in the HTML.
5. Fully Responsive Design: The website will be optimized for seamless viewing across a wide range of devices, including desktops, tablets, and mobile phones. Comprehensive testing will be performed across multiple devices to ensure a consistent user experience.

Compatible Browsers:

1. Supports major browsers including Internet Explorer 11 (IE11+), Firefox, Safari, Opera, Google Chrome, and Microsoft Edge.

Backend Technologies:

- PHP: A widely used server-side scripting language, ensuring dynamic content generation and server-side processing.
- WordPress: A robust content management system (CMS) for easy content editing and management.

Additional Technologies:

- AJAX: A technology that allows for asynchronous data loading, enhancing the website's user experience by enabling smooth interactions without page reloads.
- jQuery: JavaScript Library for enhanced interactivity and dynamic functionality.
- API Handling: Simple REST APIs are used to communicate with components.

Figure 6.1: High Level Diagram

7. Proposed Website Structure

1. Home page

The Department of Christian Religious Affairs' web portal functions as a centralized digital platform designed to facilitate efficient engagement between the citizenry and the department's administrative infrastructure. By consolidating institutional data, the interface provides users with an immediate quantitative overview of the religious landscape, supported by a formal articulation of the department's mandate and objectives. This platform serves as a critical communication platform, utilizing a structured notice board and real-time news feed to disseminate official circulars and provide transparency regarding ongoing community developments.

2. About Us page

The About Us interface functions as an authoritative transparency portal, meticulously designed to provide you with a comprehensive understanding of the department's governance, ideological foundations, and operational framework. By presenting a chronological and thematic overview of the department's evolution, the interface establishes a historical context for its current role in mediating between religious institutions and the state. The platform clarifies the organization's core identity through dedicated statements of vision, mission, and aspirations, while simultaneously offering a clear window into its internal hierarchy via a detailed organizational chart and a gallery of key officials. This structural clarity is further supported by an interactive operational section that allows you to toggle between administrative divisions, events, and programs, ensuring you can identify the specific departments responsible for various community services.

Our Vision

Work for the welfare of the Christians.

Our Mission

Provide secular support for sustenance of Christian Religion and Culture.

The Registered Sunday Schools interface serves as a specialized educational registry and data management portal, providing an empirical overview of the department's academic reach within the Christian community. By utilizing a structured tabular format, the interface enables you to analyze complex educational metrics, including the number of Sunday schools, student enrollment figures, and teacher counts categorized by specific dioceses and districts. This functionality is essential for assessing regional resource allocation and educational density, offering a transparent view of the department's commitment to religious instruction. Additionally, the interface incorporates a direct file-access system, allowing you to download official documentation or specific reports related to each district's educational standing.

4. Pasam & Lathoni Page

The Pasam Lathoni interface functions as a specialized cultural and educational repository, meticulously designed to preserve and promote the unique heritage of Sri Lankan Christian devotional art. By integrating scholarly narratives with multimedia resources, the interface provides you with an immersive look into the history and evolution of *Pasam*, particularly highlighting the linguistic and literary contributions of historical figures. This platform serves as a multi-modal learning hub, offering direct access to video performances and digital publications of various regional versions.

Taking the original goal of his master as his own, the young Father Jacome Gonsalves never hesitated to use the divine gifts of literature, knowledge, various skills and talents that God had given him to spread his Dhamma in the country.

As well as being a linguist and possessing a deep knowledge of literature, he also had other unique abilities that were second to none. He creatively manipulated the language to make it accessible to literary enjoyment, and embellished it by applying a new musical universal language to the prose and poetry he composed. There are many books written in his own style. Among them, the book of nine sermons, Pasam, which is still in the possession of many elderly Christians, is considered a national heritage. Because of his expert knowledge of the language, he is known as the Venerable Pandiwara Jacome Gonsalves Pooja Prasad Thero.

Like Rabindranath Tagore, who was called the scholar of the Mahabharata, although he was not born in our country to leave a mark on the world map as a native Christian, it is not an exaggeration to call him the great Christian scholar of the country who contributed to our country and its culture. Among the many advances that he has given to local literature, the fast-dying Pasam and the Latin mournful folk singing style are universal literary heritages that no Christian should forget.

Among the greatest discoveries in the world and the creations of the universe itself, linguistics and creative language have always been number one. It is truly a universal creation. Recognizing its weighty essence, he not only made language his heartbeat, but also transformed very complex religious teachings and principles into very simple language for the people through the subtle waves of language, but also added qualities to its language and literature, created prose and poetry, delicately touched the subtle varieties of human emotions, and added the three divine teachings of Jesus' suffering, death on the cross and resurrection, and the flavor of sorrow to bring them to the people's use. His efforts are highly commendable. I see it as a miracle.

The way that prose and verse written on that seed of matter, in the subtlety of verse and verse, vary from verse to verse, from village to village, from house to house, from door to door, from mustache to mustache, from verse to verse, its shapes, its beauties, its rhythm, its tone variations, high and low, in those many unspoken decorations, I see the miracle of universal creation. Where did he get the wisdom to create by manipulating language so delicately???

Pasam Lathoni Competition

The Pasam Lathoni Competition interface serves as a comprehensive administrative and informational portal designed to facilitate participation in the department's island-wide cultural initiatives. By centralizing all critical aspects of the competition—ranging from eligibility criteria and group composition requirements to specific song durations—the UI ensures that potential applicants have a clear, unambiguous roadmap for participation. The platform functions as a vital resource hub, providing direct links to mandated musical verses, regional melodies, and instructional video content to ensure performances remain authentic to the tradition.

Showcasing Talent & Devotion

Pasam Lathoni Competition

Island-wide Pasam and Lathoni Singing Competition - 2025

It is observed that the unique Pasam and Lathoni singing, which were introduced to Sri Lanka by the Reverend Father Jacome Gonsalves, is currently disappearing from the Christian community. With the aim of bringing this unique Christian folk singing, which has been preserved by our ancestors for over 300 years, closer to the next generation, the Department of Christian Religious Affairs has planned to hold an island-wide Pasam and Lathoni singing competition for the children of Catholic schools and Catholic Dhamma schools on the occasion of the 2025 Chatarika season.

The last date for accepting applications is 2025.02.21.

Applications can be submitted in the following ways:

- Director, Department of Christian Religious Affairs, 3rd Floor, 180, T. B. Jaya Mawatha, Colombo 10
- minchris@sltnet.lk
- 0112688126
- 0112665584

Department of Christian Religious Affairs

Pasam Lathoni Videos

Christianity Season:

Competition Conditions

- Only Catholic school students and Catholic Dhamma school students can apply.
- The competition will be held in both Sinhala and Tamil medium.
- Each student can only perform in one language medium.
- It should be a group singing.
- A group should have a minimum of 08 members and a maximum of 12 including the musicians. (Including the musicians. If musical instruments are used, they should be provided by themselves. A maximum of two instruments can be used from the keyboard/serpina/violin. Accordingly, the maximum number of musicians in the group is 02. The use of musical instruments in singing is not mandatory. The playing is not relevant to the judging of the competition.)
- One song each from each of the two genres, Pasam and Lathoni, should be submitted. (The Pasam and Lathoni that you intend to sing should be submitted to the department along with the application and confirmed that it is correct)
 - Pasam - Songs written about the suffering of the children of Jesus.
 - Lathoni - Songs reflecting the lamentation of Mary.
- Each song should be limited to 3 minutes.
- You must submit an application prepared by you with the recommendation of the school principal/principai. (The application should state the name of the group, address, phone number and WhatsApp number of the group leader. All information about the competition will be made through that phone number)
- The Department's website (www.christian.gov.lk) allows you to download pasam and Latin verses and melodies.
 - Pasam and Latoni Purana-Volume One-Chilaw
 - Pasam and Latoni Purana - Volume Two - Negombo
 - Pasam and Latoni Purana-Volume Three-Dakshina
- 209 Pasam songs have been uploaded on the Department's YouTube channel. (www.youtube.com/@christianreligiousaffairs)
- It is not mandatory to sing the Pasam songs preserved by the Department as above and one can sing a Pasam and Lathoni of one's choice according to the words and tunes peculiar to one's area.
- The venues for the competitions will be decided based on the nature of the applications received.
- The decision of the judging panel is final.

5. News page

The News & Announcements interface operates as a dynamic information clearinghouse, designed to ensure that you are promptly informed of the department's latest administrative updates, liturgical schedules, and official circulars. By utilizing a sophisticated filtering and search system, the UI allows you to navigate through various content categories—such as announcements, events, and publications—enabling you to pinpoint specific information relevant to your needs.

6. Gallery Images page

The Gallery Images interface functions as a visual archive and historical record, designed to provide you with a transparent and engaging look into the department's community-driven initiatives and significant events. By utilizing a clean, grid-based layout, the interface allows you to browse through high-resolution photographs that document religious gatherings, award ceremonies, and cultural competitions, effectively humanizing the department's administrative work. The integration of a focused search bar enables you to filter the visual record by specific event names, while the pagination system at the bottom ensures smooth navigation through a substantial volume of historical data without overwhelming the page.

7. Gallery Videos page

The Gallery Videos interface serves as a dynamic multimedia archive, providing a cinematic record of the department's most significant cultural and religious milestones. By transitioning from static imagery to "Stories in Motion," the UI offers you a more immersive experience, allowing for the review of liturgical performances, keynote addresses, and event highlights in high-definition video format.

8. Resorts page

The Resort page functions as an integrated reservation and information management system, specifically engineered to simplify the logistics of religious travel and accommodation. By centralizing essential stay details, the interface provides you with a comprehensive suite of tools to evaluate and secure lodging, ranging from a dynamic availability calendar and pricing widget to a detailed breakdown of room types and their respective amenities. The platform emphasizes transparency by presenting structured tables of room rates alongside a dedicated section for payment protocols, supporting a variety of digital transaction methods

The screenshot displays the 'Thalawila Pilgrim House' page on the SLT Mobitel website. The page header includes contact information and navigation links. The main content area features a large image of the house, a price widget showing 'From Rs. 2,000 / night', and a reservation form with check-in and check-out date fields. Below the main image are four smaller images showing interior rooms. The 'About' section describes the resort's location and amenities. The 'Accommodation' section is partially visible. The 'Location & Contact' section provides address, telephone, fax, and email details.

About

Thalawila Pilgrim House is a peaceful holiday resort located in the sacred coastal town of Thalawila, just steps away from the historic St. Anne's Shrine. Designed to provide comfort, relaxation, and spiritual calm, the resort is an ideal destination for pilgrims, families, and travelers seeking a quiet getaway by the sea.

The resort offers clean, comfortable, and well-maintained rooms suitable for individuals, families, and group stays. Each room is designed to ensure a restful experience with essential amenities and a calm atmosphere.

Accommodation

The resort offers clean, comfortable, and well-maintained rooms suitable for individuals, families, and group stays. Each room is designed to ensure a restful experience with essential amenities and a calm atmosphere.

Location Advantage

Strategically located near St. Anne's Shrine, the resort provides convenient access for religious visits while also offering a peaceful coastal environment. Guests can enjoy the beauty of the surrounding nature and the calmness of the nearby beach.

Excellent facilities and very peaceful environment. The caretaker was extremely helpful and the rooms were spotlessly clean. Highly recommend for family holidays.

Great location with beautiful gardens. The amenities were well maintained and the check-in process was smooth. Would definitely visit again.

9. Contact Us page

The Contact Us interface functions as the primary communication bridge between the public and the Department of Christian Religious Affairs, designed to facilitate formal inquiries and provide immediate access to administrative support. The UI is structured into two distinct functional zones to accommodate different urgency levels and communication preferences. On one side, it provides a comprehensive directory.

10. Downloads – Annual Performance Reports page

The Annual Performance Reports interface serves as a formal public record and accountability portal, providing users with transparent access to the department's operational and financial history. The UI is designed as a structured document repository where you can browse a chronological list of reports, ensuring that the department's year-on-year progress and resource management remain open for public scrutiny. A key functional feature of this interface is its commitment to linguistic inclusivity; the data table offers multi-language download options for each report—available in Sinhala, Tamil, and English—to accommodate the diverse national community.

The screenshot shows the 'Downloads Annual Performance Reports' page. The header includes contact information and a navigation menu. The main content area features a search bar, a filter dropdown set to 'All Status', and a 'Reset Filter' button. Below this is a table with columns for 'Document Name', 'Sinhala', 'Tamil', and 'English'. The table lists five annual performance reports from 2021 to 2025, each with download icons for the three languages.

Document Name	Sinhala	Tamil	English
Annual Performance Report 2025			
Annual Performance Report 2024			
Annual Performance Report 2023			
Annual Performance Report 2022			
Annual Performance Report 2021			

11. Downloads – Other page

The Downloads – Other interface functions as a comprehensive administrative utility hub, designed to provide you with immediate access to all non-performance-related documentation required for religious and civic engagement. To optimize the user experience, the UI is organized into distinct thematic sections—including Visa assistance, Church registration, Pilgrim House applications, and general Publications—allowing you to quickly locate specific forms or guidelines based on your current administrative needs.

Footer

The Footer section will be consistently displayed across all pages and will serve as a centralized area for essential information and quick navigation. It will include company contact details, quick links to key pages, a search function, and corporate branding elements. The footer will enhance usability, improve information accessibility, and reinforce the professional identity of the Department of Christian Religious Affairs throughout the website.

Admin Interfaces

1. Church Registration Management System

1. Home page

The Church Registration Management dashboard serves as a comprehensive central command for overseeing the entire lifecycle of religious institution applications. By consolidating critical performance metrics at the top of the interface, the system allows you to instantly track the volume of active requests, average review times, and overall approval success rates for the current fiscal year. The interactive workflow visualizer provides a real-time roadmap of the bureaucratic journey, showing exactly how an application moves from initial submission through various ministerial reviews and security clearances to the final certificate. This high-level visibility is paired with a granular ministry queue and a detailed recent applications table, enabling you to manage high-priority tasks and identify bottlenecks within specific government departments at a glance.

2. Applications page

The Applications management interface provides a centralized digital workspace for tracking and processing church registration records with precision. At the top of the interface, summary cards offer an immediate snapshot of the total workload, highlighting the number of files currently pending, under review, or finalized. To facilitate efficient data retrieval, the interface includes a robust filtering system that allows you to isolate specific records by name, date range, application type, or approval stage. The primary data table serves as an interactive ledger, displaying crucial details such as the assigned officer and the ministry currently handling each file, while action buttons on each row let you view, edit, or manage individual cases directly.

The screenshot displays the 'Church Registration Management' interface, specifically the 'Applications' section. The page features a sidebar with navigation options: Dashboard, Applications (selected), Pending Review, Certificates, Reports, Notifications, Settings, and Logout. The main content area shows a summary of applications: All Applications (284), Pending (14), Under Review (37), Approved (77), and Rejected (4). Below this, there is a search bar and filters for date range (From 01 Jan 2025 to 31 Dec 2025), application type, status, and stages. A table titled 'Recent Applications' lists the following data:

APP ID	CHURCH NAME	TYPE	FILED DATE	ASSIGNED OFFICER	STATUS	STAGE	ACTIONS
VLS-2634	Holy Redeemer Church Colombo District - Catholic	New Registration	25 Mar 2026	S. Kumara	Dept Review	2/5	View, Edit, Delete
VLS-2631	Grace Evangelical Fellowship Gampaha District - Christian	Renewal	20 Mar 2026	R. Perera	Buddhasasana	3/5	View, Edit, Delete
VLS-2629	St. Sebastian's Parish Negombo - Catholic	Amendment	15 Mar 2026	D. Jayawardena	MOD Clearance	4/5	View, Edit, Delete
VLS-2628	Calvary Christian Centre Kandy District - Christian	New Registration	12 Mar 2026	S. Kumara	MOD Clearance	4/5	View, Edit, Delete
VLS-2625	All Saints Cathedral Colombo District - Anglican	Renewal	11 Mar 2026	R. Perera	Approved	5/5	View, Edit, Delete
VLS-2619	New Life Assembly Moratuwa District - Pentecostal	New Registration	05 Mar 2026	D. Jayawardena	Approved	5/5	View, Edit, Delete

At the bottom of the table, it indicates 'Showing 1-6 of 47 applications' and provides pagination controls (1, 2, 3, ..., 8). There are also buttons for 'Export Excel' and 'Download Report'.

3. New Church Registration page

The New Church Registration interface functions as a structured, multi-step intake system designed to simplify the complex process of formalizing a religious organization. By using a progressive stepper at the top, the interface guides you through distinct phases—from basic church and applicant details to document uploads and final submission—ensuring data entry remains manageable and logically organized. A real-time form completion tracker provides immediate feedback on your progress, flagging missing information or errors like incomplete addresses to prevent submission delays. Integrated side panels keep the broader context visible by displaying the anticipated approval roadmap and offering quick actions to forward the file to relevant ministries.

The screenshot displays the 'Church Registration Management' interface. The top navigation bar includes a search bar, the date 'Thursday, 26 March 2026', and the user 'Admin User'. The left sidebar contains a menu with 'MAIN' (Dashboard, Applications, Pending Review, Certificates), 'DATA' (Reports, Notifications), and 'SYSTEM' (Settings, Logout). The main content area is titled 'New Church Registration' and features a progress stepper with four steps: 1. Church Details (In Progress), 2. Applicant Details (Not Started), 3. Documents (Not Started), and 4. Review & Submit (Not Started). The '1. Church Details' section includes a 'DENOMINATION / TYPE' dropdown with options: Roman Catholic (selected), Protestant / Anglican, Pentecostal / Charismatic, Evangelical / Baptist, Methodist / Presbyterian, and Other Christian. Below this is a 'CHURCH / ORGANISATION NAME' field with the example 'e.g. St. Joseph's Catholic Church'. There are also optional fields for 'SINHALA NAME (OPTIONAL)', 'TAMIL NAME (OPTIONAL)', and 'STREET ADDRESS / NO.'. On the right, a 'Form Completion' widget shows a 65% completion rate with a circular progress indicator and a list of items: Denomination selected (checked), Church name entered (checked), Address incomplete (warning), Email error to fix (warning), Applicant details (warning), and Required document (warning).

4 . View Church Registration page

The View Church Registration screen serves as a comprehensive administrative profile for a specific application, providing a high-level summary and detailed data in a single, read-only perspective. At the header, you can quickly identify the application ID, its current status, and the assigned officer, with options to edit, print, or share the file immediately. An interactive timeline tracks the approval workflow progress, highlighting exactly which department is currently reviewing the file and which steps remain.

The screenshot displays the 'Church Registration Management' interface. The top header includes a search bar, the date 'Thursday, 26 March 2026', and the user 'Admin User'. The left sidebar contains navigation links: Dashboard, Applications (selected), Pending Review, Certificates, Reports, Notifications, Settings, and Logout. The main content area shows the application details for 'VLS-2634 - Holy Redeemer Church'. It includes a status bar with 'Dept. Review' and 'New Registration' buttons, and a list of actions: Print, Share, and Edit. Below this, the 'Approval Workflow Progress' is shown as a timeline with six steps: 1. Application Submitted (06 Apr 2025), 2. Dept. Review (In Progress), 3. Buddhassana Ministry (Awaiting), 4. MOD Clearance (Awaiting), 5. Final Approval (Awaiting), and 6. Certificate Issued (Awaiting). The last update timestamp is '07 Apr 2025, 09:41 AM'.

5 . Pending Review

The Pending Review screen operates as a high-priority task manager designed to streamline the verification of church registration applications. At the top of the interface, summary widgets provide an immediate update on operational throughput, displaying the number of files currently awaiting review, those that have become overdue, and daily performance metrics for reviewed and forwarded cases. The central Review Queue offers a specialized view of the workload, uniquely highlighting the status of essential documentation—such as land deeds, NIC copies, and authorization letters—directly within the list so you can spot missing requirements without opening each file. This table allows you to monitor which officers are handling specific cases and the current ministerial stage of each application.

6. Certificates

The Certificates interface functions as a digital registry and compliance tracker for all finalized church registrations. At the top of the screen, summary cards provide an immediate overview of the department's current standings, highlighting the total number of active certificates, those approaching expiration, and the volume of documents issued within the current month. The central Certificate Registry table allows you to monitor the specific validity periods for each institution, clearly marking status updates like "Active" or "Expiring Soon" to help prioritize renewal outreach.

7. New Certificates

The New Certificate screen acts as the finalization portal for the registration process, enabling you to generate formal legal documentation for approved institutions. The interface is divided into a data entry section and a live preview, ensuring that all information—including application references, denominations, and validity dates—is perfectly accurate before official issuance. You can specify issuing officers and authorized signatories while adding internal remarks for administrative record-keeping. A particularly useful feature is the automated notification checkbox, which allows you to send an instant SMS or email to the applicant the moment the document is generated.

The screenshot displays the 'New Certificate' interface within the 'Church Registration Management' system. The page is divided into a sidebar, a main header, and a central content area.

Sidebar (Left): Contains navigation links under 'MAIN' (Dashboard, Applications, Pending Review, Certificates), 'DATA' (Reports, Notifications), and 'SYSTEM' (Settings, Logout). The 'Certificates' link is highlighted.

Main Header: Displays 'Church Registration Management', a search bar, the date 'Thursday, 26 March 2026', and the user 'Admin User'.

Content Area:

- Home / New Certificate:** Breadcrumbs at the top.
- New Certificate:** Section title with 'Export', 'Print', and '+ Issue New Certificate' buttons.
- Issue New Certificate:** A form with the following fields:
 - APPLICATION REFERENCE *
 - CERTIFICATE TYPE *
 - CHURCH / ORGANISATION NAME *
 - DISTRICT *
 - DENOMINATION *
 - DATE OF ISSUE *
 - EXPIRY DATE *
 - ISSUING OFFICER *
 - AUTHORISED SIGNATORY *
 - REMARKS / NOTES *
- Notification:** A checkbox labeled 'Send SMS and email notification to the applicant upon certificate issuance'.
- Certificate Preview:** A section showing a preview of the certificate document. The preview includes:
 - Department of Christian Religious Affairs, 3rd Floor, No. 160, T.B. Jaya Mawatha, Colombo 10.
 - VLS/REC/2634/2026, 30 March 2026, OFFICIAL DOCUMENT.
 - DEMOCRATIC SOCIALIST REPUBLIC OF SRI LANKA
 - Certificate of Registration
 - DEPARTMENT OF CHRISTIAN RELIGIOUS AFFAIRS
 - CALVARY CHRISTIAN CENTRE
 - NEW REGISTRATION - KANDY DISTRICT, SRI LANKA
 - CERTIFICATE NUMBER: CERT-2634
 - VALID UNTIL:
- Buttons:** 'Issue Certificate' and 'Cancel' buttons are located at the bottom right of the preview section.

8. Reports

The Reports screen functions as a powerful data analytics hub designed to transform raw registration data into actionable insights for administrative decision-making. At the top of the interface, key performance indicators provide an instant summary of high-level metrics, such as total applications processed and the breadth of district coverage. The interface is the Report Templates section, which offers pre-configured modules for generating specialized documents, including annual registration summaries, monthly activity logs, and specific security clearance submissions. Each template is tagged with its relevant category—such as "Ministry-Ready" or "Certified"—to ensure you are using the correct format for official purposes.

The screenshot displays the 'Church Registration Management' web application. The interface includes a sidebar with navigation options: MAIN (Dashboard, Applications, Pending Review, Certificates), DATA (Reports, Notifications), and SYSTEM (Settings, Logout). The 'Reports' section is active, showing 'Official Reports' with four key metrics: TOTAL APPLICATIONS (284), CERTIFICATES ACTIVE (221), REPORTS GENERATED (58), and DISTRICTS COVERED (25). Below these metrics is a search bar and a 'Report Templates' section. The templates include 'Annual Registration Report', 'Monthly Activity Report', and 'MOD Clearance Submission', each with filters for 'Annual', 'Ministry-Ready', and 'Certified', and a 'Generate' button. The top right of the interface shows a search bar, the date 'Thursday, 26 March 2026', and the user 'Admin User'.

2. Priesthood Identity / Passport Certification System

1. Home

The Priesthood Identity and Passport Certification dashboard provides a high-level command center for managing the authentication and documentation of religious clergy members. By presenting a series of real-time data visualizations, the interface allows you to instantly assess the department's workload through summary cards that track total, pending, approved, and rejected applications for the current month. The central workspace features a list of recent submissions, enabling you to identify individual applicants and their clerical roles while providing direct pathways to process each file.

2. Applications

The Applications management screen serves as a dedicated digital ledger for organizing and overseeing the priesthood identity and passport certification pipeline. This interface provides a searchable, filtered environment where you can quickly locate specific records by name, ID, or diocese, ensuring that high volumes of requests remain easily navigable. The primary data table offers an immediate breakdown of each applicant's role, their geographic diocese, and the specific type of certification requested—whether for identity, passport purposes, or both. Status indicators such as "In Review," "Approved," or "Rejected" allow for instant visual tracking of each file's progress, while dedicated action buttons provide direct access to view the full details of any individual case.

3. Approvals

The Approvals management screen functions as a high-intensity workspace designed to facilitate the rapid review and authorization of clergy documentation. At the top of the interface, summary widgets categorize the active queue by criticality, providing an immediate headcount of cases that are pending, currently under review, or flagged as urgent. This allows you to prioritize your workload effectively, ensuring that time-sensitive requests are addressed without delay. The interactive grid layout displays each applicant's profile in a card format, surfacing essential details like document verification status, specific certification needs, and the duration an item has remained in the queue.

4. Certificates

The Certificates screen serves as a specialized drafting and issuance portal for generating official clergy credentials, such as Priesthood Identity Certificates and Passport Letters. The interface features a side-by-side workspace where you can select an approved application from a dropdown menu to automatically populate essential details like clerical roles, dioceses, and validity periods. As you refine the certificate information—including issuing authorities and authorized signatories—a live, interactive preview displays exactly how the final document will appear, complete with official formatting and security QR codes.

The screenshot displays the 'Priesthood Identity/Passport Certification' web application. The interface is divided into a left sidebar, a main content area, and a right-hand 'Live Preview' section.

Left Sidebar: Contains navigation links under 'MAIN' (Dashboard, Applications, Approvals, Certificates), 'DATA' (Reports, Archive), and 'SYSTEM' (Settings, Logout).

Main Content Area:

- Header:** 'Priesthood Identity/Passport Certification' with a search bar and user profile (Admin User).
- Breadcrumbs:** Home / Certificates
- Buttons:** 'Identity certificate' (selected) and 'Passport letter'.
- Select Approved Application:** A dropdown menu with the text 'Choose an application'.
- Certificate Details:**
 - FULL NAME ON CERTIFICATE:** Text input field with placeholder 'Full name as it appears on the certificate'.
 - ROLE / TITLE:** Dropdown menu with 'Father' selected.
 - DIOCESE:** Dropdown menu with 'Archdiocese of Colombo' selected.
 - ISSUE DATE:** Text input field with '26 March 2026'.
 - VALID UNTIL:** Text input field with '25 March 2027'.
 - CERTIFICATE NUMBER:** Text input field with 'CERT-2026-XXXX'.
 - ISSUING AUTHORITY:** Text input field with 'Archdiocese of Colombo - Chancery Office'.
 - SIGNATORY:** Text input field with 'Rev. Fr. Chancellor, Diocese Secretary'.
 - SPECIAL NOTES (optional):** Text area with placeholder 'Any additional remarks to appear on the certificate...'.
- Actions:** 'Generate certificate', 'Save draft', and 'Clear' buttons.

Live Preview Section:

- Header:** 'Department of Christian Religious Affairs', 'Certificate of Priesthood', 'Identity Certification'.
- Text:** 'This is to certify that', 'Father - Archdiocese of Colombo', 'Is a duly ordained and professed member of the Catholic Clergy, in good standing within the Diocese, recognised under canon law and authorised to perform all ecclesiastical functions pertaining to their sacred office.'
- Metadata:** '26 March 2026' (Issue date), 'CERT-2026-XXXX' (Certificate no.), and a QR code.
- Footer:** 'Validity period: 26 March 2026', '12 months remaining', '25 March 2027'.
- Actions:** 'Download PDF', 'Print', and 'Send email' buttons.

5. Reports

The Church Registration Management system is a centralized platform designed to streamline the lifecycle of religious institution applications. Through a cohesive dashboard, you can monitor the entire bureaucratic pipeline—from initial submission and departmental reviews to ministerial clearances and final certificate issuance. The interface provides granular control over individual applications, allowing you to track required documentation, manage officer assignments, and maintain an audit trail for every status change. By integrating real-time workflow visualizers, comprehensive reporting tools, and automated notifications, the system ensures that administrative processes remain transparent, efficient, and accountable, ultimately facilitating the orderly registration and certification of religious organizations.

6. Archive

The Archive interface serves as a long-term historical record for the Priesthood Identity and Passport Certification system, providing a secure and organized environment for managing completed documentation from previous years. By offering a searchable and filterable repository, the UI allows you to quickly retrieve past certification records based on specific criteria such as the cleric's name, their diocese, the type of certificate issued, or the fiscal year of completion. The centralized data table acts as a permanent ledger, displaying essential information including unique certificate numbers, issue dates, and original validity periods, which ensures that you can verify the credentials of clergy members long after their initial application was processed

The screenshot displays the 'Archive' section of the 'Priesthood Identity/Passport Certification' system. The interface includes a sidebar with navigation options: Dashboard, Applications, Approvals, Certificates, Reports, Archive (selected), Settings, and Logout. The main content area shows a table of archived records with columns for CERT NO., NAME, ROLE, TYPE, DIOCESE, ISSUED, VALID UNTIL, and ACTION. The table contains six records, each with a 'View' button. Above the table, there is a search bar and filters for dioceses, types, and years. The top right corner shows the date 'Thursday, 26 March 2026' and the user 'Admin User'.

7. New Application

The new Application interface is a dedicated digital workflow designed to manage the end-to-end authentication of clergy credentials. From the central dashboard, you can oversee active application volumes, track approval statuses through real-time visualizations, and manage critical tasks like new submissions or pending reviews. The system enables you to intake applicant data—such as personal information and specific certification needs for identity or passport purposes—using a structured, multi-step process that ensures all required legal details are captured accurately. With integrated management tools for processing approvals, generating formal certificates, and archiving historical records, the interface provides comprehensive administrative oversight, allowing you to maintain compliance and deliver timely documentation for members of the religious clergy.

3. Visa Recommendation Letter Management System

1. Home

The Visa Recommendation Letter Management dashboard is a centralized command center for overseeing the processing of entry visas, resident visas, and visa extensions for religious personnel. The interface provides immediate transparency into the administrative pipeline through high-level summary cards that display total application volume, pending reviews, and the number of letters ready for issuance. A specialized breakdown categorizes the workload by current processing stage, ranging from initial departmental review.

The screenshot displays the 'Visa Recommendation Letter Management' dashboard. The interface includes a sidebar with navigation options: Dashboard, Applications, Approvals, Letters, Entry Visa, Resident Visa, Visa Extension, Reports, Notifications, Settings, and Logout. The main content area shows a 'Dashboard Overview' with summary cards for Total Applications (128), Pending Review (14), Approved (YTD) (37), and Letters Issued (77). Below these are cards for Department Initial Review (47), Buddhassana Ministry Review (23), MOD Security Clearance (12), Ministry Final Approval (05), and Issuance Letter Ready (08). A 'Recent Applications' table lists applications with columns for App ID, Applicant, Visa Type, Stage, Status, Submitted, and Actions. The table shows six applications with various statuses like 'MOD Review', 'Ready to Issue', 'Buddhassana', 'Ministry Pending', 'Dept Review', and 'Letter Issued'. On the right, an 'Approval Process' flowchart shows five steps: Department Review, Buddhassana Ministry, MOD Clearance, Ministry Final, and Letter Issuance. A 'Recent Activity' section lists recent events such as letter issuance, review requests, and record imports.

2. Applications

The Applications Registry interface functions as a specialized management hub for tracking the high-volume processing of visa recommendation letters. By organizing the workflow into distinct categories for Entry Visas, Resident Visas, and Extensions, the interface allows you to monitor over a thousand records simultaneously while maintaining clear visibility of specific active cases. The primary data table serves as an interactive ledger, surfacing critical information such as the applicant's name, their church affiliation, the current step in the approval journey, and a live status indicator that ranges from initial review to final notification.

The screenshot displays the 'Visa Recommendation Letter Management' interface. The top navigation bar includes a search bar, the date 'Thursday, 26 March 2026', and a user profile 'Admin User'. The left sidebar contains a 'MAIN' menu with 'Dashboard', 'Applications' (highlighted), 'Approvals', and 'Letters', and a 'SYSTEM' menu with 'Settings' and 'Logout'. The main content area is titled 'Applications Registry' and features a summary of application counts: All Applications (1284), Entry Visa (14), Resident Visa (37), Extension (77), and Letters Issued (4). Below this is a search bar and filter options for visa types, stages, and statuses. The 'Recent Applications' table lists the following data:

APP ID	APPLICANT	VISA TYPE	STAGE	STATUS	SUBMITTED	ACTIONS

The Entry Visa management view provides a focused environment for processing short-term international travel recommendations for religious personnel. This interface consolidates critical tracking data into a high-density table, allowing you to monitor the specific visa type, the applicant's associated church, and their current progression through the five-stage approval hierarchy. With built-in status indicators like "Dept Review" or "Ready to Issue," the UI ensures you can immediately distinguish between files requiring ministerial action and those ready for final documentation

3. Application Details

The Application Details interface serves as a comprehensive dashboard for managing visa recommendation applications, providing users with a centralized hub to monitor and process requests efficiently. By consolidating essential data such as applicant details, real-time approval progress, and a chronological activity timeline, the system allows administrators to instantly assess the status of any case, such as the current "MOD Clearance" stage for the user.

4. Approvals Page

The Approvals dashboard functions as a high-level command center designed to streamline the decision-making process by providing a clear, summarized view of all pending visa recommendation requests. It empowers users to manage high volumes of applications through executive summary tiles that categorize workload by departmental stages, while advanced filtering and search capabilities ensure specific cases are easily accessible.

5. Letters Page

The Letter Generation interface provides a sophisticated, end-to-end workspace for finalized visa recommendation documents, bridging the gap between administrative approval and official correspondence. This UI allows users to select a verified applicant and instantly pair their data with specific letter templates—such as Entry, Resident, or Extension letters—ensuring that the content is both accurate and contextually appropriate. A dynamic, real-time preview pane offers a "what you see is what you get" experience, allowing administrators to toggle official letterhead elements and ministry seals on or off before finalizing the document.

The screenshot displays the 'Visa Recommendation Letter Management' interface. The left sidebar contains navigation links: Dashboard, Applications, Approvals, Letters (selected), Entry Visa, Resident Visa, Visa Extension, Reports, Notifications, Settings, and Logout. The main content area is titled 'Generate Recommendation Letter' and includes a 'Select Application' section with a table showing application details for 'Fr. Anthony Silva'. Below this is the 'Letter Type' section with radio buttons for 'Entry Visa Letter' (selected), 'Resident Visa Letter', and 'Visa Extension Letter'. The 'Letter Options' section allows toggling various letterhead elements. The 'Letter Preview' section on the right shows a real-time preview of the generated letter, including the official header of the Ministry of Buddhasana, Religious and Cultural Affairs, and the body text of the recommendation letter. At the bottom, there is an 'Export & Distribute' section with buttons for Generate PDF, Download, Send Email, Print, and Share Link.

6. Notification Page

The Notification Logs interface serves as a centralized communications hub designed to ensure transparency and accountability throughout the visa application lifecycle. By providing a comprehensive overview of all sent correspondence—including both successful and failed SMS and email delivery statuses—the dashboard allows administrators to actively monitor system-wide reach and troubleshoot communication issues in real-time. The integration of high-level analytics alongside granular, per-application logs enables users to not only track the history of automated updates but also initiate manual, targeted notifications for specific applicants.

The screenshot displays the 'Notification Logs' page within the 'Visa Recommendation Letter Management' system. The interface includes a sidebar with navigation options like Dashboard, Applications, Approvals, Letters, Visa Types, Reports, and Notifications. The main content area shows a summary of notification statistics, a 'Send Applicant Notifications' section, a search bar, and a detailed 'Notification Log' table. At the bottom, there is a 'Quick Send' form and a performance summary widget.

7. Reports Page

The Reports interface acts as a high-level strategic intelligence center, transforming raw application data into actionable insights for administrative oversight. By utilizing dynamic date ranges and category filters, users can evaluate organizational performance through key metrics such as average processing time, overall approval rates, and total volume of issued letters. The visual components—including monthly volume trends, approval status breakdowns, and a multi-stage process funnel—allow administrators to identify operational bottlenecks and seasonal peaks at a glance.

4. Church Renovation Information System

1. Church Renovation Information System Dashboard

The Dashboard serves as the central overview of the system, providing users with a real-time snapshot of renovation activities. It displays key metrics such as the total number of renovations, pending approvals, projects in progress, and completed renovations. Additionally, it highlights recent renovation requests along with details and current status. A visual status distribution chart helps users quickly understand the overall progress of projects. The dashboard also includes quick action options for common tasks and showcases recent system activities, enabling efficient monitoring and decision-making.

2. Renovation Requests

The Renovation Requests module manages all renovation submissions within the system. It displays a comprehensive list of requests with key details such as location, type of work, submitted date, proposed budget, and current status. Requests are categorized into cards such as All, Pending, In Progress, Completed, and Rejected for easy view. Users can add new requests, search and filter existing records, and export data when needed. The module also supports viewing detailed information, as well as editing and deleting requests, ensuring complete control over renovation data.

3. Renovation Request Detail Page

The Renovation Request Detail Page provides an in-depth view of a selected renovation request. It includes detailed church information, assigned reviewers, and an activity timeline showing the progress of the request. Users can view the current status, scope of work, and budget details. The module also supports uploading and managing renovation request letters, as well as before and after photographs of the renovation. This page acts as a centralized location for all information and documentation related to a specific renovation request.

The screenshot displays the 'Church Renovation Information' system interface. The page title is 'Church Renovation Information' with a search bar and user profile 'Admin User' on the right. The left sidebar contains navigation links: Dashboard, Requests (highlighted), Approvals, Projects, Gallery, Reports, Settings, and Logout. The main content area shows the 'Request Details' for request #REN-2026-001, submitted on 10 January 2026, with a 'Pending Approval' status. The 'Church Information' section details 'St. Mary's Basilica' (Roman Catholic, Established 1878) in Colombo, Western Province, built in 1934. The 'Assigned Reviewer' is Mr. M. Fernando, Senior Heritage Architect, with an 'Active' status. The 'Activity Timeline' shows three steps: 'Request submitted' (10 Jan 2026), 'Documents verified' (12 Jan 2026), and 'Assigned for review' (14 Jan 2026).

Renovation Description

High Priority

The roof of the main nave has suffered significant structural deterioration due to heavy monsoon rains and prolonged water ingress over the past three years. Critical sections of the timber trusses are showing signs of rot, and several roofing tiles have displaced, posing a risk to the congregation and the historic interior. Immediate restoration is required to preserve both the architectural heritage and the safety of the building.

4. Projects

The Projects module focuses on managing and tracking approved renovation projects. It presents project data through summary cards such as total projects, completed projects, projects in progress, and planned projects. Users can search and filter projects based on various criteria. The module also provides visual comparisons of before and after renovation images and allows users to view detailed project information. This helps stakeholders effectively monitor the execution and outcomes of renovation activities.

		Sacred Heart Church	Planned	Dec 2026 - Jul 2027	Kalutara, Western Province	LKR 150,000	View Full Details

5. Gallery

The Gallery module serves as a visual repository for all renovation related images. It stores and displays photographs of projects, including before and after renovation images. Users can search and filter images based on project details, making it easy to locate specific visual records. The module also allows users to view full image details, supporting transparency and documentation of renovation progress. The module also displays project statuses such as Completed, In Progress, and Planned, enabling users to easily track the progress of renovation activities.

6. Reports

The Reports module enables users to generate comprehensive monitoring and progress reports based on selected date ranges. Reports include summaries such as total number of projects, completed projects, total budget utilization, and average project duration. Visual elements like graphs illustrate the renovation process and status breakdown, while additional insights such as projects by province and recent project details are also included. Users can export these reports for sharing and analysis, supporting informed decision-making.

7. Approvals

The Approvals module manages the review and authorization process for renovation requests. Authorized users can approve or reject requests after carefully reviewing all relevant details. The module also supports bulk approval for efficiency when handling multiple requests. Once approved, selected renovation details can be published on the public portal for transparency and public awareness. This module ensures a structured and controlled approval workflow within the system.

The screenshot displays the 'Church Renovation Information' system, specifically the 'Approvals' section. The interface includes a sidebar with navigation options: Dashboard, Requests, Approvals (selected), Projects, Gallery, Reports, Settings, and Logout. The main content area shows a summary of requests: Total Requests (128, up 3 this week), Awaiting Decision (14, 2 urgent), Approved (37, 2 this month), and Rejected (77, this quarter). Below this is a search bar and filters for statuses, dioceses, priority, location, and sorting. The main list displays four renovation requests, each with details such as church name, location, priority, budget, submission date, waiting time, description, reviewer, and action buttons (Reject, Approve). The status of each request is indicated by a colored dot and label (Pending, Approved, Rejected).

St. Mary's Basilica	Colombo	High priority	LKR 6,100,000	02 Nov 2025	79 days	Foundation settlement observed along the east wall. Requires underpinning and reinforcement to prevent further cracking to this heritage building.	S. Kumara, Conservation Officer	Rejected

5. Free of Charge Medical Letter Issuing System

1.Free of Charge Medical Letter Issuing Dashboard

The Dashboard provides a centralized interface for quickly accessing and managing medical letter requests. By entering the applicant's passport number, the system automatically retrieves and displays relevant application details from the existing Visa Recommendation System. Users can review the associated visa letter and proceed to create the medical letter. Additionally, the dashboard displays recent visa applications along with visa types and available actions, enabling efficient tracking and quick processing of requests.

RE: RECOMMENDATION LETTER
**Entry Visa Recommendation for
 Fr. Anthony Silva**

FULL NAME Fr. Anthony Silva	PASSPORT NO. GH2847391	NATIONALITY Sri Lankan
VISA TYPE Entry Visa	REFERENCE NO. VLS-2634	APPROVED DATE 28 Mar 2026

To Whom It May Concern,

 of Sri Lanka, in support of the visa application submitted by Mr. Anthony Silva, a citizen of Sri Lanka bearing Passport Number GH2847391.

 The applicant has applied for an Entry Visa for the purpose of religious study and pilgrimage within Sri Lanka. Having reviewed the application in accordance with the established procedures of the Ministry, we are pleased to have reviewed the application in accordance with the established procedures of the Ministry, we are pleased to confirm that the applicant meets all requisite criteria and has been duly cleared at all stages of the approval process, including the Ministry of Defence security clearance.

 Yours faithfully,

S. Amarasinghe
 Director General - Visa Recommendation Services

2. Medical Letters

The Medical Letters module displays a list of recently issued medical letters along with key details such as visa type, status, and available actions like view and print. It includes search and filter functionalities to help users quickly locate specific records. The module also supports generating administrative reports related to medical letters, which can be exported in formats such as Excel for further analysis and record keeping.

The screenshot shows the 'Medical Letters' module interface. The left sidebar contains navigation links: Dashboard, Medical Letters, New Medical Letter, Entry Visa, Resident Visa, Visa Extension, Reports, Notifications, Settings, and Logout. The main content area displays a table of recent medical letters with columns for Date & Time, Applicant, Passport Number, Visa ID, Visa Type, Status, and Actions. The table lists six entries with details such as applicant names (Fr. Anthony Silva, Sr. Mary Colette, Fr. James Perera, Sr. Agnes Fernando, Fr. Anthony Silva, Sr. Mary Colette), passport numbers, visa IDs, visa types (Entry Visa, Resident Visa, Visa Extension), and statuses (Issued, Printed, Pending, Notified). A search bar and filter options are at the top, and a 'New Medical Letter' button is in the top right. At the bottom, there are 'Export Excel' and 'Download Report' buttons.

3.New Medical Letters

The New Medical Letters module facilitates the creation and issuance of free of charge medical letters. Users can enter the applicant's passport number to retrieve application details and review the corresponding visa letter. The system then allows users to generate and print system created medical letters. Additionally, users can download the letter, send it via email, or share it through a link, ensuring convenient and efficient distribution of documents.

6. Thalawila Pilgrim House Online Booking System

1. Thalawila Pilgrim House Online Booking Dashboard

The Dashboard provides a comprehensive overview of the reservation system, displaying key metrics such as total reservations, pending approvals, payment verifications, total members, and active resorts. It allows users to search and filter information for quick access. Additionally, the dashboard highlights recent bookings with details such as room code, guest roles, check in and check out dates, amount, and payment status. This enables staff to efficiently monitor booking activities and make timely decisions.

The screenshot shows the 'Thalawila Pilgrim House Online Booking' dashboard. The left sidebar contains navigation links: Dashboard, Booking Management, Member Management, Payment Verification, Resort Management, Reports, Notifications, Settings, and Logout. The main content area displays 'Booking Management' with a search bar and a '+ New Booking' button. Below this are five summary cards: Total Reservations (7), Pending Approvals (5), Payment Verifications (3), Total Members (7), and Active Resorts (3). A 'Recent Bookings' table follows, showing details for six bookings. The table columns are: NAME, ROOM, CHURCH, ROLE, CHECK IN, CHECK OUT, AMOUNT, PAYMENT, STATUS, and ACTION. The bookings are for Anthony Silva, Mary Colette, James Perera, Agnes Fernando, Anthony Silva, and Mary Colette, with various room codes (TPH-R01 to TPH-R06) and churches. The payment status is 'Due-Payment' and the booking status is either 'Confirmed' or 'Pending'.

NAME	ROOM	CHURCH	ROLE	CHECK IN	CHECK OUT	AMOUNT	PAYMENT	STATUS	ACTION
Anthony Silva	TPH - R01	Holy Redeemer Church	James Perera Father	14 Mar 2026	16 Mar 2026	LKR 13,200.00	Due-Payment	Confirmed	
Mary Colette	TPH - R02	Grace Evangelical Fellowship	Mary Colette Sister	08 Mar 2026	11 Mar 2026	LKR 16,500.00	Due-Payment	Pending

2.Booking Management

The Booking Management module is responsible for handling all reservation related activities in a structured and organized manner. It provides a comprehensive view of all bookings, including detailed information about guests, rooms, dates, and payment status. Users can add new bookings and export booking data for reporting or administrative purposes. Under the action section, users are able to approve, modify, or cancel reservations based on availability and administrative decisions, ensuring efficient control over the booking process.

The screenshot displays the 'Thalawila Pilgrim House Online Booking' web application. The interface includes a sidebar with navigation options: Dashboard, Booking Management (selected), Member Management, Payment Verification, Resort Management, Reports, Notifications, Settings, and Logout. The main content area is titled 'Booking Management' and features a search bar, filters for resorts and statuses, and a 'Reset Filter' button. Below these is a table titled 'All Bookings' with columns for Name, NIC, Reservation No, Room, Check In, Check Out, Amount, Payment, Status, and Action. The table lists six bookings with details such as guest names, reservation numbers, room types, dates, amounts, and payment statuses (Due-Payment, Confirmed, Pending). A pagination bar at the bottom indicates 'Showing 1-6 of 47 applications'.

3.Member Management

The Member Management module displays all registered users who have created accounts but have not yet made any reservations. It provides a clear view of member details, allowing administrators to monitor inactive or new users effectively. The module includes a search function that enables users to quickly locate members using name or NIC number. Additionally, filtering options are available to refine results based on different criteria, helping administrators manage and analyze member data more efficiently.

The screenshot shows the 'Member Management' interface. On the left is a sidebar with navigation links: Dashboard, Booking Management, Member Management (highlighted), Payment Verification, Resort Management, Reports, Notifications, Settings, and Logout. The main content area is titled 'Member Management' and includes a search bar, filters for 'All resorts' and 'All statuses', and a 'Reset Filter' button. Below these is a table titled 'All Members' with columns: NAME, NIC, CHURCH, PHONE, MEMBER SINCE, PROFILE STATUS, and ACTION. The table lists six members with their respective details and status (Active or Inactive). At the bottom, it shows 'Showing 1-6 of 47 applications' and a pagination control.

NAME	NIC	CHURCH	PHONE	MEMBER SINCE	PROFILE STATUS	ACTION
Anthony Silva antonys@gmail.com	923142266v	Holy Redeemer Church	071 234 5678	25 Mar 2026	Active

Mary Colette mary@gmail.com	933142266v	New Life Assembly	071 234 9678	05 Mar 2026	Active	

4.Payment Verification

The Payment Verification module ensures secure and accurate handling of all booking payments. It displays payment details including transaction status, payment amount, and uploaded payment slips submitted by users. Staff can review these details and verify payments. The module also allows administrators to take actions such as approving or rejecting payments, ensuring transparency and reducing the risk of errors or fraudulent transactions.

The screenshot shows the 'Payment Verification' module of the 'Thalawila Pilgrim House Online Booking' system. The interface includes a sidebar with navigation options like Dashboard, Booking Management, Member Management, Payment Verification (highlighted), Resort Management, Reports, Notifications, Settings, and Logout. The main content area displays a table of payments with columns for Name, Reservation No, Church, Role, Amount, Method, Date, Status, Slip / Ref, and Action. The table lists six pending payments from various churches, including Holy Redeemer Church, Grace Evangelical Fellowship, St. Sebastian's Parish, Calvary Christian Centre, All Saints Cathedral, and New Life Assembly. Each entry shows the payment amount in LKR, the method used (Bank Transfer or Credit Card), and the date of payment. The status is consistently 'Pending' for all listed payments. The interface also features a search bar, filters for resorts and statuses, and a 'Reset Filter' button. A pagination bar at the bottom indicates 'Showing 1-6 of 47 applications'.

5. Resort Management

The Resort Management module manages all room and facility related information within the system. It provides detailed data such as room codes, room types, pricing, maximum occupancy, availability status, and current booking status. This module helps maintain real-time availability of rooms, ensuring that users can view accurate information when making reservations. It also supports efficient resource allocation and helps administrators manage resort operations effectively.

Analytic Report

An analytic report will be provided to have a detailed analysis of data collected through various channels to help inform decision-making and support objectives. When using Google Analytics for this purpose, the report typically includes key metrics and insights related to Website traffic, user behavior, and audience demographics.

The following are some elements that are included in the analytics report,

- **Website Traffic Overview:** Provides data on visitors, page views, sessions, and bounce rates, helping understand engagement levels.
- **Audience Demographics:** Offers insights on visitor location, interests, and other details which useful for targeting audiences.
- **Acquisition Data:** Shows how visitors find the site (e.g., organic search, ads, social media), helping to identify effective marketing channels.

Figure 7.1: Analytic Report Snapshot

9. Project Plan with Gantt Chart

Table 1: Project Plan

Phase	Activities	Completion
Initial Consultation	Collaboration between the Department of Christian Religious Affairs and Digital Services - Sri Lanka Telecom (Services) Limited to discuss Department of Christian Religious Affairs unique functionality requirements preliminary conception of proposed design.	07/05/2026
Customized Web Development	Hand-coding of a lightweight solution tailored to meet Department of Christian Religious Affairs functionality requirements integration of solution into Department of Christian Religious Affairs .	30/07/2026
Maintenance, Upgrades, and Technical Support	Digital Services - Sri Lanka Telecom (Services) Limited will assist Department of Christian Religious Affairs as needed.	

GANTT CHART

Figure 9.1: Gantt Chart

9.1. Payment Schedule

Invoicing shall be carried out in accordance with the payment schedule outlined below. All invoices shall be settled within thirty (30) days from the date of invoice issuance.

- **40%** upon formal acceptance of the project commencement
- **50%** upon delivery of the completed website.
- **10%** upon final acceptance of the website by the Client

9.2. Annual Maintenance Contract

Upon successful acceptance of the website, the Client may enter into an Annual Maintenance Contract (AMC) with Digital Services – Sri Lanka Telecom (Services) Limited on a renewable, year-by-year basis.

- The AMC fee shall be 20% of the total development cost, covering system maintenance and technical support.
- In the event of introducing new features or modules beyond the original scope, the AMC value shall be revised accordingly based on the additional development cost incurred due to such value additions.

9.3. General Terms and Conditions

- This proposal is valid until 23rd June 2026.
- Software/customer/Website/company data or any other data/information leakage is prohibited, and Digital Services - Sri Lanka Telecom (Services) Limited is liable for damages in a breach.
- Client is responsible for responding to required clarifications within a reasonable time frame.

10. Customer Support Service

Digital Services – Sri Lanka Telecom (Services) Limited provides 24x7x365 real-time customer support via telephone to ensure uninterrupted service delivery and continuous operational availability for all clients.

The customer support service covers incident reporting, issue resolution, technical guidance, and service-related inquiries throughout the lifecycle of the website. All reported issues will be addressed in accordance to minimize downtime and ensure system reliability.

Support services include assistance during system operation, troubleshooting of website related issues, performance monitoring, and coordination of corrective actions where necessary. Preventive support measures may also be applied to reduce the likelihood of recurring issues and to maintain optimal performance.

11.Deliverables

The following deliverables shall be provided upon completion:

- **Fully Functional Website** – A fully developed, responsive, and user-friendly website that incorporates all agreed features, functionalities, and design elements, ensuring seamless operation across desktops, tablets, and mobile devices.
- **Content Management System (CMS)** – A robust and intuitive admin interface that allows authorized users to efficiently create, edit, and manage website content without technical assistance.
- **Documentation** – Technical guides, user manuals, and configuration instructions to enable proper understanding.
- **Deployment & Support** – Complete deployment of the website to the production environment, along with configuration and initial user training to ensure a smooth launch.
- **Analytics and Reporting Setup** – Integration of website analytics tools to monitor visitor trends, traffic statistics, and user engagement, providing the client with actionable insights for ongoing improvement.

12. Past Projects

Superior Courts - <https://supremecourt.lk/>

Department of Labour - <https://labourdept.gov.lk/>

The screenshot displays the official website of the Sri Lanka Department of Labour. The header includes contact information (+94 112 104 800, contacts@labourdept.gov.lk) and navigation links in Sinhala and English. The main banner features the slogan "Empowering Workforce Excellence" and a background image of a smiling woman. Below the banner, there are three columns: "Main Services" (Employees' Provident Fund, Salary, Child Labour, Occupational Safety), "e-Services" (Digital EPF, Register Trade Union, Register Safety committee, Circuit Bungalows), and "Downloads" (Application Forms, Annual Reports, Statistics, Labour Legislations). A "RECENT NEWS" section highlights four articles: "The Pledge", "EPF Mobile Service Week", "National Minimum Wage and Budgetary Relief Allowance of Workers Acts and Circular", and "Budgetary Relief Allowance of Workers (Amendment) Bill and National Minimum Wage for Workers". A "NOTICES" section features a "PROCUREMENT NOTICE". The "ABOUT US" section provides an overview of the department's history and mission, stating its goal to provide welfare for migrant Indian estate labourers and contribute to the socio-economic development of Sri Lanka.

Firearms and Ballistic Section

[Home / Services / Firearms and Ballistic Section](#)

Our Divisions

- > Forensic Science Section
- > Firearms and Ballistic Section
- > Forensic Explosive and Fire Investigation Division
- > Forensic Toxicology Section
- > Narcotic drugs and Psychotropic Substances Section

The Firearms and Ballistics Section of the Government Analyst's Department plays a crucial role in examining and analyzing evidence related to various firearms-related crimes. This includes cases of shootings, firearm-related offenses, illegal possession of firearms and ammunition, spent cartridge cases, fired bullets, and other projectile-related evidence. The section conducts thorough forensic examinations and provides analytical reports to assist law enforcement and the judiciary.

The common physical evidence submitted to this section for examination includes pistols, revolvers, rifles, and automatic firearms, as well as locally manufactured improvised firearms, shotgun barrels, spent cartridge cases, fired bullets, bullet fragments, and gunshot residue.

Additionally, experts in this section assist the police and other law enforcement agencies in crime scene investigations related to shootings. They play a vital role in examining firearms-related crime scenes, vehicles, and buildings, as well as
